BOOK

*Are you a money-sensible family?*

# Simply Great Financial Planning

## GIP suggestions:

**GIP** stands for **G**rowth, **I**ncome and **P**rotection.

1. Reduce your EMI liability (if any) gradually;
2. Do not opt EMI for fresh loans for acquiring depreciating non financial assets. Open a “digitrade account (demat account with trading facilities) with Integrated.
3. Open a “digitrade account (demat account with trading facilities) with Integrated.
4. Convert your deposits into “zero coupon” bonds or debentures giving the same return. Zero coupon bonds are considered as short term capital assets. and there will not be any tax deducted at source Zero bonds will be useful for keeping emergency fund for managing unexpected expenses and situations.
5. Take a suitable insurance policy to plan for retirement and protect your wealth (financial assets).
6. Sum assured on insurance policy should not be less than the margin funding facility.
7. The annual premium should be based upon the ability to pay and the SUM ASSURED” should be around 50 times of monthly expenses.
8. Opt for suitable Lite Fund and specialised mutual fund schemes based on your preference
9. Wide variety of passive funds are available for investments: Debt funds; Equity funds; >65% equity funds; balanced hybrid funds, liquid fund, zero bond, alternative funds
10. Restrict your direct equity exposure to 10% of your financial assets.
11. Opt for employer’s contribution to NPS (14%) wherever available to plan your retirement Two months” income should be considered as allocation towards acquiring intangible assets (i.e. peace of mind, tax payment, retirement planning)
12. Do not borrow to make investments, as the returns will be lower than the cost of borrowing.

## Ready Reckoner - Monthly Financial Plan

( For GIP - Growth, Income & Protection )

| Average annual income | Intangible benefits Std. deduction+ NPS tax deducted at course | Monthly cashflow (after tax payment and NPS contribution (month) | GIP savings (Growth, Income with Protection) (20%) | Systematic Invest Plan SIP (10%) | Max. EMI (suggested 25%) | Maximum suggested free spending | Min SA on death (in lacs) Insurance 50 times | Suggested Annual Premium ( Min. Annual Premium) | Max. suggested Limited payment deferred annuity. |

### Note:

- One month income is adjusted towards payment of income tax and another one month represents intangible savings in the form of standard deduction facility for salaried class, employer's contribution to the NPS etc.  
In other words, 12 month income before tax is considered as 10 month income after payment of tax.
- 10% of monthly income is saved and invested in the form of SIP deposits which will be used to meet the emergency expenses and the accumulated money can be used for paying the annual insurance premium falling due next year.

## Smart Monthly Money Planner (with Income Tax Insights)

| Monthly income (after NPS deduction) | Intangible savings (std. ded-n+NPS) | Monthly TDS (approximate) | Tax rate% | Net cashflow pm (after TDS) | GIP savings (Growth, Income with Protection) | Max.EMI (suggested 25%) | Maximum free spending (suggested 65%) | Suggested Min SA on death (in lacs) Insurance (in lacs) | Suggested Annual Premium |
|--------------------------------------|-------------------------------------|---------------------------|-----------|-----------------------------|----------------------------------------------|-------------------------|---------------------------------------|---------------------------------------------------------|--------------------------|

# Precautions to be Taken Before Opting for EMI

**EMI stands for equated monthly instalment payment including a part of the principal loan**

1. Loan amount, Interest rate, loan period, EMI payment are linked to each other.
2. EMI instalment amount should be based upon the “ability to pay instalments in time. Credit card dues also should be included while deciding about the “ability test
3. EMI amount should not exceed 25% of the net income (after tax) of the borrower
4. 25% of net income (after tax) should be considered as the optimum ability to pay instalments in time. Total outstanding Loan amount should not exceed “Five years” expected income, irrespective of the security offered
5. Financiers will consider Interest portion of the EMI payment first before adjusting against principal loan
6. Maximum repayment period can be calculated on the basis of simple “72” formula. Housing loan: 7.7% interest:8 years  
Vehicle loan : 12% interest 6 years  
Credit card : 24% interest 3 years.
7. Following table shows the way interest amount is adjusted by the bank. Approximate outstanding principal (after adjustment towards interest) is as follows:

| Outstanding principal at year end |              | 25% EMI | 20% EMI | 15% EMI |
|-----------------------------------|--------------|---------|---------|---------|
| At the end of                     | First year   | 91.03%  | 91.32   | 91.62   |
| At the end of                     | Second year  | 81.33%  | 81.62   | 81.92   |
| At the end of                     | Third year   | 70.72%  | 71.01   | 71.30   |
| At the end of                     | Forth year   | 59.12%  | 59.41   | 59.70   |
| At the end of                     | Fifth Year   | 46.42%  | 46.71   | 47.00   |
| At the end of                     | Sixth Year   | 32.33%  | 32.83   | 33.12   |
| At the end of                     | Seventh Year | 17.35%  | 17.64   | 17.93   |
| At the end of                     | Eighth Year  | 0.73%   | 1.03    | 1.32    |
| At the end of                     | Ninth Year   | -       | -       | -       |

**The EMI % represents the outstanding principal amount as a percentage of the total principal loan.**

**GROWTH**

**INCOME**

**PROTECTION**

### **Growth**

To Create Your Financial security by Long Term Wealth Creation.

### **Income**

To meet Your short-term financial requirements & providing stability to your portfolio

### **Protection**

To Protect Your family by providing a safety net against any unforeseen events.
